RoseDowns

SPARE PARTS

BUILDING ON A LEGACY

RoseDowns manufacture quality spare parts for all makes & models of screw press.

RoseDowns use the highest quality materials and advanced manufacturing processes to produce market-leading spare parts.

Quality spare parts should not only provide real benefits but also come with the technical support necessary to ensure they exceed all expectations.

Thanks to its strategically located stock hubs, **RoseDowns** take pride in offering a **Spare Parts Service** that truly makes a difference:

- Availability of the parts you need, when you need them
- The right materials for the right application
- Advanced designs to maximise wear life and efficiency

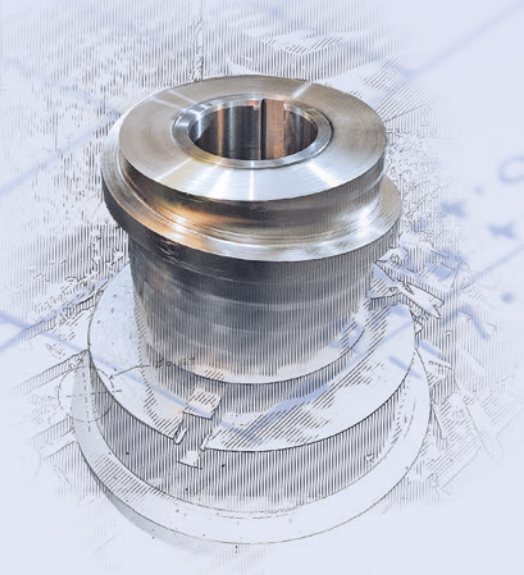
RoseDowns can boast in-house design and manufacturing of all its main wear parts. Consumable parts are designed and manufactured by **RoseDowns in Kingston upon Hull**, **UK**, and **Verden**, **Germany**, bringing significant advantages not only to RoseDowns' own equipment but also to other makes and models of screw presses.

SPARE PARTS

ADVANCED MATERIALS

With years of experience and a strong tradition in R&D, RoseDowns are constantly developing the materials used in their spare parts production. Longer wear life and more cost-effective parts, with materials suitable for most applications:

- **Gold Star** – Unbeatable wear life for high-capacity applications
- **Hard Faced** – Wear resistance and toughness for high-pressure applications
- **Case Hardened** – Low cost to suit all budgets

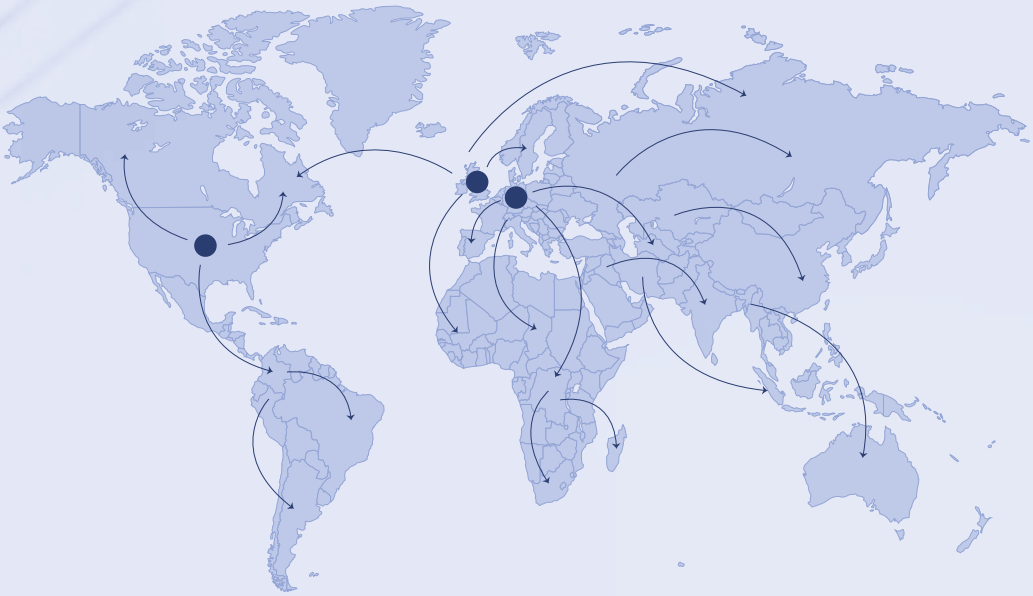


SPARE PARTS AVAILABILITY

Spare parts are available from stock at the following locations:

- Kingston upon Hull, **United Kingdom**
- Verden, **Germany**
- Kansas City, **North America**

Ensuring you get the parts you need when you need them.



QUALITY MANUFACTURING

High performance spare parts are only possible through quality manufacturing methods. **RoseDowns** continually invest in equipment and systems to stay at the forefront of technology.

TECHNICAL ADVICE

RoseDowns spare parts are engineered to perform across a wide range of materials, ensuring optimal efficiency and durability. To help you get the most from every component, we provide expert technical advice, on-site service visits, and responsive troubleshooting. Delivering complete peace of mind with every part we supply.

LINING BARS

Available in various profiles to suit different needs

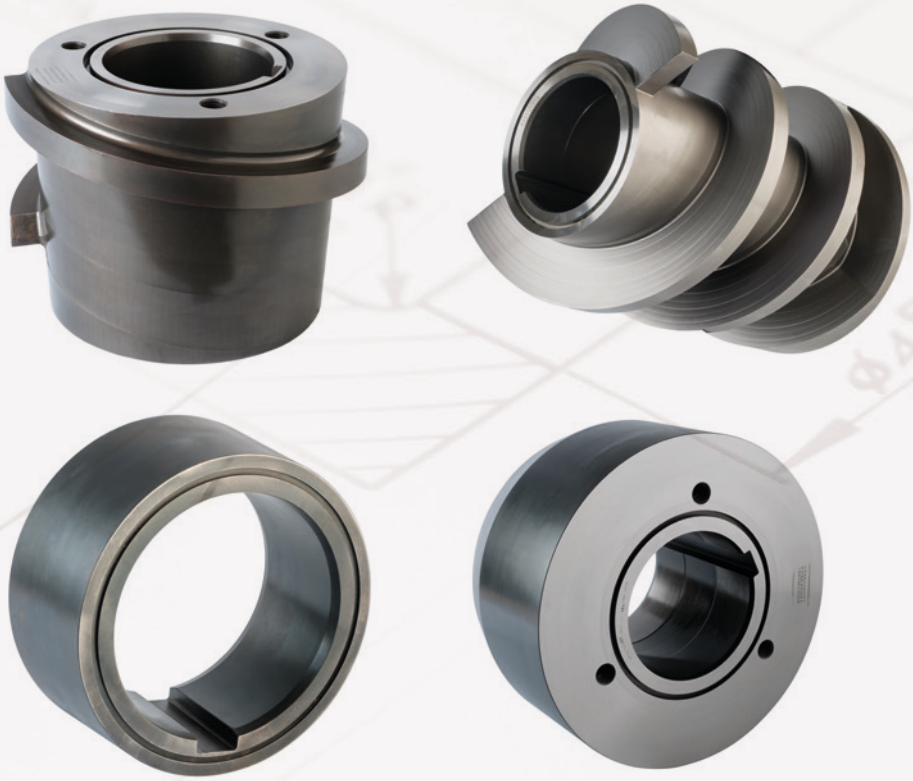
KNIFE & SHOE FRAME BARS

Available in different materials to suit your application

SPARES

WORM SEGMENTS

Worm segments are profiled in different ways to offer optimum performance specific to the material being processed. The advanced design techniques developed by RoseDowns enable a range of different sections to be assembled on the shaft



MIXERS

The mixer segment designed by RoseDowns is used in the worm assembly configurations to agitate the material whilst in the press, thus increasing oil yield
